

Instructions

Before installing iSkin protector, clean iPod to remove any dust, dirt or oils.

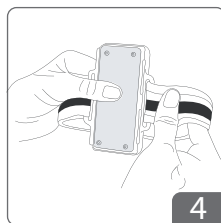

Insert a clean iPod nano into the iSkin Slim as shown.

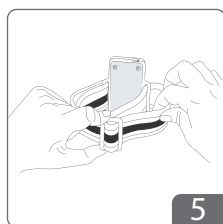

Pull iSkin over to completely cover the iPod nano and adjust corners until perfectly fitted.

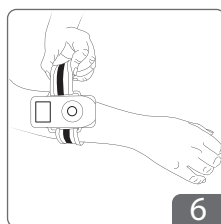

Insert iPod nano / iSkin combo into the DuoBand by first inserting one side and then the other as shown.

Pull the band gently to flex the clear shield to allow the iSkin to properly fit together.

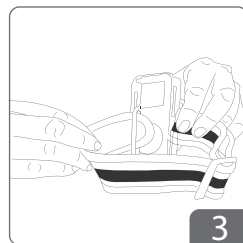

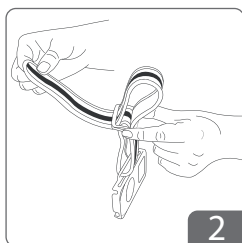

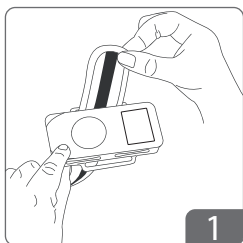

Adjust the band size by sliding the adjusting bracket to the desired length to accommodate the thickness of your arm.

Slide the DuoBand over arm to the desired position. There is no need to unclatch the velcro portion.

Installing the DuoBand

CLEANING THE iSkin

To help maintain a clean iSkin and ultimately a clean iPod, it's recommended that you remove the iSkin from the iPod nano and wash in a solution of dishwashing liquid and warm water. Be sure to rinse and dry thoroughly before reinserting the iPod nano. Refer to installation instructions when ready to apply the iSkin to iPod nano.
