User's Guide

Experience DuoBand™ for iPod nano 3G

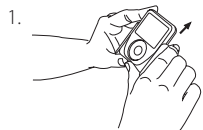

1 Prepare your iPod nano

Before installing the DuoBand, first thoroughly clean the iPod nano with a soft, lint free cloth to remove all surface dirt or oil. This will help the DuoBand fit and protect better, and to last longer.

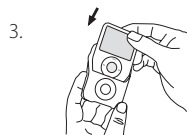

2 Placing the iPod into the DuoBand

1. Start by pushing up, and completely separating, the iPod nano protector from the armband's bracket.

2. Next, separate the ViSOR from the silicone layer. Remove the packaging inside the silicone.

3. Then, insert the iPod nano through the screen area opening of the silicone layer.

4. Gently massage the silicone layer, so that it fits and aligns perfectly with all iPod nano corners and openings.

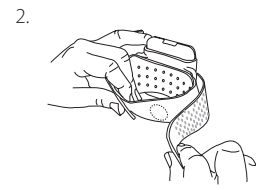

5. Lastly, attach the ViSOR, from top to bottom, until it latches snugly to the silicone layer.

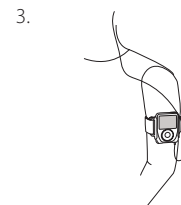

3 Installing the Breathable Band

1. Insert the iPod nano + iSkin into the armband bracket as shown.

2. Once securely installed, use both hands to adjust the armband from either or both sides to the desired length.

3. Finally, slide the fully-installed DuoBand onto the preferred arm, and into the desired position.

Cleaning the DuoBand Hybrid iPod nano Protector

To help maintain a clean Hybrid iPod nano protector—and a clean iPod nano, too — we recommend the following:

1. Completely remove the iPod nano from the iSkin DuoBand protector.
2. Wash only the silicone protector (excluding the ViSOR) in a solution of warm water infused with mild liquid soap.
3. Thoroughly air dry the silicone protector before reinstalling the iPod.

Cleaning the Armband

To clean the armband, wipe with a damp cloth. Air-dry at room temperature.
